The new building codes are to be applied to structures that are constructed, repaired or to which additions are made on and after January 1, 2008. The 2006 IRC and the 2006 IBC as adopted will be the building code for determining eligibility for windstorm and hail insurance through the Association in designated catastrophe areas.

B-0034-07

ISBN: 0784471312. Publication Date: 2006-01-01. Flood Resistant Design and Construction provides minimum requirements for flood-resistant design and construction of structures located in flood hazard areas. Revising the earlier ASCE/SEI 24-98, this standard applies to new structures, including subsequent work, and to substantial repair or improvement of existing structures that are not historic structures.

Building Codes - Civil and Environmental Engineering ...

Structural loads or actions are forces, deformations, or accelerations applied to structure components. Loads cause stresses, deformations, and displacements in structures. Assessment of their effects is carried out by the methods of structural analysis. Excess load or overloading may cause structural failure, and hence such possibility should be either considered in the design or strictly ...
