Neuromusculoskeletal Examination and Assessment focuses on the development of technical and clinical reasoning skills involved in differential diagnosis of joint nerve and muscle tissues. It is designed for physiotherapy/manual therapy students and their teachers but is also ideal for those in the first years of their practice as an educational support for patient care.

Neuromusculoskeletal Examination and Assessment ...  
This is a practical guide to the examination and assessment of the neuromusculoskeletal system which aims to enable the therapist to identify a client's problem before deciding on a treatment. Because it focuses on these preliminary diagnostic processes it is a complementary text supporting books on the various treatment techniques themselves (such as the available books by Leon Chaitow, Gregory Grieve, etc).
