NH₃ is liberated if these ions are present, and it turns damp red litmus paper blue. Always use damp red litmus paper, by making the litmus paper wet. Nothing happens if the litmus is not damp! And make sure that the litmus paper never touches the test tube, because the test tube might contain an alkali which will turn the litmus paper blue.

Paper 3 - The Breakdown. Paper 3 comprises two sections; Section A is compulsory and you will most likely have two questions of which one will be data-based and the second will be based on at least one of the prescribed practicals you should have carried out during your taught course. Irrespective of level, this section is worth 15 marks of the total for paper 3; it is therefore more significant for SL students.
