This updated and expanded 3rd edition of Chinese Foreign Policy seeks to explain the processes, actors and current history behind China's international relations, as well as offering an in-depth look at the key areas of China's modern global relations. Among the key issues are: The expansion of Chinese foreign policy from regional to international interests China's growing economic power in an era of global financial uncertainty Modern security challenges, including maritime security, counter-terrorism and protection of overseas economic interests The shifting power relationship with the United States, as well as with the European Union, Russia and Japan. China's engagement with a growing number of international and regional institutions and legal affairs The developing great power diplomacy of China New chapters address not only China's evolving foreign policy interests but also recent changes in the international system and the effects of China's domestic reforms. In response to current events, sections addressing Chinese trade, bilateral relations, and China's developing strategic interest in Russia and the Polar Regions have been extensively revised and updated. This book will be essential reading for students of Chinese foreign policy and Asian international relations, and highly recommended for students of diplomacy, international security and IR in general.

When Beijing hosted the 2008 Summer Olympics, China symbolically asserted its role as an emerging world power -- a position it is not likely to relinquish anytime soon. China's growing economy, military reforms, and staggering productivity have contributed to its ascendancy as a major player in international affairs. Western scholars have attempted to explain Chinese foreign policy using historical or theoretical evidence, but until this volume, few studies from a Chinese perspective have been published in English. In Challenges to Chinese Foreign Policy: Diplomacy, Globalization, and the Next World Power, editors Yufan Hao, C. X. George Wei, and Lowell Dittmer reveal how Chinese scholars view their nation's rise to global dominance. Drawing from a wealth of foreign relations experts including scholars native to the region, this volume examines the unique challenges China faces as it adapts in its role as a world leader, and it analyzes how China's evolving international relationships are shaping the global landscape of the twenty-first century.

In this timely text, Denny Roy shows how the drive for security and power underlying Chinese foreign policy is reinforced by other important factors, including China's internal political struggles and unique, historically driven perceptions of international affairs. Providing a wide-ranging assessment of China's foreign policy, the author explores the PRC's relationships with key international organizations and countries, including the United States, Japan, Russia, Korea, India, and the Southeast Asian states.

Despite its increasingly secure place in the world, the People's Republic of China remains dissatisfied with its global status. Its growing material power has simultaneously led to both greater influence and unsettling questions about its international intentions. China also has found itself in a constant struggle to balance its aspirations abroad with a daunting domestic agenda. This authoritative book provides a unique exploration of the complex and dynamic motivations behind Beijing's foreign policy. The authors focus on China's choices and calculations on issues such as the ruling Communist party-regime's interests, international status and image, nationalism, Taiwan, human rights, globalization, U.S. hegemony, international institutions, and the war on terrorism. Taken together, the chapters offer a comprehensive diagnosis of the emerging paradigms in Chinese foreign policy, illuminating especially China's struggle to engineer and manage its rise in light of the opportunities and perils inherent in the post-cold war and post-9/11 world.

Zhou Enlai and the Foundations of Chinese Foreign Policy offers a comprehensive survey of China's foreign relations from 1949-76, while focusing on the significant role which Zhou Enlai played. Through in depth analysis, the book explores the formation of Zhou Enlai's world view and his conduct of Chinese diplomacy throughout all the critical periods of the People's Republic of China. This study makes it possible to understand some of the most important and persistent factors aside from political ideology that have shaped China's foreign policy decisions and will be very useful to students of international relations and Chinese foreign policy.

Publisher description

There has been a discernable calibration of Chinese foreign policy since the ascension of Xi Jinping to the top leadership positions in China. The operative term here is adjustment rather than renovation because there has not been a fundamental transformation of Chinese foreign policy or "setting up of a new kitchen" in foreign affairs. Several continuities in Chinese diplomacy are still evident. The People's Republic of China (PRC) has not wavered from its overarching strategy of rising through peaceful development. The PRC is still an active participant and leader in, or shaper of, global and regional regimes even as it continues to push for reforms of the extant order, towards an arrangement which it thinks will be less unjust and more equitable. It seeks to better "link up with the international track", perhaps even more so under Xi's stewardship. Yet amidst these continuities, it is clear that there have been some profound shifts in China's foreign policy. From the enunciation of strategic slogans such as the "Asian security concept" and "major country diplomacy with Chinese characteristics"; the creation of the China-led and initiated Asian Infrastructure Investment Bank; the pursuit of Xi's signature foreign policy initiative, the One Belt One Road; to a purportedly more assertive and resolute defense of China's maritime territorial interests in East Asia/examples of these foreign policy calibrations (both patent and subtle) abound. In short, this has not been a complete metamorphosis but there are real changes, with important repercussions for China and the international system. The burning questions then are What, Where, How and Why: What are these key foreign policy adjustments? Where and how have these occurred in Chinese diplomacy? And what are the reasons or drivers that inform these changes? This book seeks to capture these changes. Featuring contributions from academics, think-tank intellectuals and policy practitioners, all engaged in the compelling business of China-watching, the book aims to shed more light on the calibrations that have animated China's diplomacy under Xi, a leader who by most accounts is considered the most powerful Chinese numero uno since Deng Xiaoping.

The concept 'peaceful development' has become the new thinking in Chinese foreign policy under the fourth-generation leadership. But what are the new dimensions of Chinese foreign policy and how do they impact China's foreign relations? This is the first edited volume that attempts to address this significant question, and its insightful contributions will enrich understanding of new dimensions of Chinese foreign policy and their implications for China's relations with the world.

The book presents the views of leading Chinese and American scholars working in the fields of Chinese foreign policy, national security and international political economy. It seeks to challenge the conventional wisdom about China's recent rise, contending it is a much more complex and contested trend than it has often been portrayed to be.

China's inexorable rise as a major world power is one of the defining features of the contemporary political landscape. But should we heed the warnings of a so-called 'China threat'? Is China set to become the next superpower? Or will its ambitions be tempered by economic and political realities both at home and abroad? In this insightful and balanced analysis, noted China expert Stuart Harris explores China's present foreign policy and its motivations, focusing in particular on the extent to which China will co-operate with the West in years to come. He considers what factors, international or domestic, will influence the foreign policies being shaped in Beijing, including how far the Chinese regime will adhere to existing global norms and the evolving international system. In contemplating this uncertain future, Harris assesses the considerable challenges and vulnerabilities likely to impact on Chinese foreign policy, leading it to be cautious and hesitant or assertive and aggressive on the international stage. Concise and authoritative, this book will be essential reading for anyone seeking a clearer understanding of the international relations of one of the world's most important powers.
