A special DSM 5 Supplement by Sandra Hockenbury is available for Fall 2013 and Spring and Summer 2014 courses.

In this innovative approach to the Intro Psychology course, authors John Cacioppo and Laura Freberg present psychology as an integrative science that is highly relevant for students of all majors. The authors have kept a familiar chapter structure, providing an easy roadmap for the introductory psychology course, but the similarities with other approaches to introductory psychology end there. Integration extends in two directions, highlighting connections within psychology as well as between

psychology and other disciplines. The writing and features are smart and engaging, and consistently illustrate the benefit of using multiple perspectives within psychology. Cacioppo and Freberg offer the best science possible, including exciting new research findings likely to expand students' understanding of psychology as a scientific field of study. Features and images coordinate with and enhance the text, providing many additional opportunities for critical thinking and connecting ideas. Psychology is evolving into an integrative, multidisciplinary field, and this text offers an opportunity to teach all of psychology in one place and at one time. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Through lively writing and stimulating examples, authors Carole Wade and Carol Tavris invite readers to actively explore the field of psychology and the fundamentals of critical and scientific thinking. "Invitation to Psychology" presents the science of psychology according to six areas of the learner's experience: Your Self, Your Body, Your Mind, Your Environment, Your Mental Health and Your Life. This unique organization engages readers from the very beginning and gives them a framework for thinking about human behavior. Incorporating many active learning and critical thinking features, a balance of classic and contemporary research, and thorough integration of the psychology of women and men of all cultures-readers will learn much to take with them. For individuals seeking an introduction to psychology.

Recipient of the 2017 Textbook Excellence Award from the Textbook & Academic Authors Association (TAA) Up to date with current DSM-5 coverage throughout, the comprehensive, highly-readable Fourth Edition of Clinical Psychology: Science, Practice, and Culture provides students vital exposure to the real-world practice of clinical psychology balanced with the latest research in the field. Throughout the book, author Andrew M. Pomerantz explores clinical assessment, psychotherapy, ethical and professional issues, current controversies, and specialized topics in a scholarly, yet fascinating, easy-to-read style. Value-priced and packed with clinical examples, the Fourth Edition offers more coverage of cultural/diversity issues in clinical psychology than any other text for the course, as well as thorough coverage of recent, prominent developments in psychotherapy and clinical assessment. New topics, new pedagogy, expanded discussions of ethics, and hundreds of new references published since 2014 make this a resource students will keep and refer to throughout their professional lives.
