Mathematics for Economics and Business, 9e is the essential resource you need when studying mathematics as part of your economics, management or business course. Whatever your level of prior mathematical knowledge, ability or confidence, this book will guide you step-by-step through the key mathematical concepts and techniques you need to succeed. Starting with the basics, the book is designed to allow you to progress at your own pace, with a wealth of examples, practice exercises and self-test questions to check your understanding along the way. Worked examples throughout each chapter illustrate how mathematical concepts and techniques relate to the business world and encourage you to solve real problems yourself. Over 200 new questions have been added to this new edition, with answers provided, making it a fantastic resource for revision purposes. Additional online resources to support your learning, including an online homework and tutorial system can be accessed via MyLab Math, which accompanies this book. You need an access card and a course ID, issued by your lecturer.

An essential resource for anyone studying mathematics as part of their economics, management or business course. Mathematics for Economics and Business assumes very little prior knowledge of maths, starting with the basics and gradually building up to more advanced topics, making it suitable for use on both low- and high-level quantitative methods courses. Now in its ninth edition, the book has added even more examples and practice questions, encouraging students to tackle problems for themselves as they read through each section. Worked examples clearly illustrate the link between maths and the business world and more challenging questions for those with advanced mathematical knowledge are included in starred sections. Detailed solutions to all questions are provided so that students can check their own progress, making it an ideal text for self-study.
