Archaeology - the study of human cultures through the analysis and interpretation of artefacts and material remains - continues to captivate and engage people on a local and global level. Internationally celebrated heritage sites such as the pyramids—both Egyptian and Mayan—Lascaux caves, and the statues of Easter Island provide insights into our ancestors and their actions and motivation. But there is much more to archaeology than famous sites. Ask any archaeologist about their job and they will touch on archaeological theory, chemistry, geology, history, classical studies, museum studies, ethical practice, and survey methods, along with the analysis and

interpretation of artefacts and sites. Archaeology is a much broader subject than its public image and branches into many other fields in the social and physical sciences. This multi-volume work provides a comprehensive and systematic coverage of archaeology that is unprecedented, not only in terms of the use of multi-media, but also in terms of content. It encompasses the breadth of the subject along with key aspects that are tapped from other disciplines. It includes all time periods and regions of the world and all stages of human development. Mostly importantly, this encyclopedia includes the knowledge of leading scholars from around the world. The entries in this encyclopedia range from succinct summaries of specific sites and the scientific aspects of archaeological enquiry to detailed discussions of archaeological concepts, theories and methods, and from investigations into the social, ethical and political dimensions of archaeological practice to biographies of leading archaeologists from throughout the world. The different forms of archaeology are explored, along with the techniques used for each and the challenges, concerns and issues that face archaeologists today. The Encyclopedia of Global Archaeology has two outstanding innovations. The first is that scholars were able to submit entries in their own language. This book provides a fascinating, encyclopedic antidote for the mysticism and pseudoscience surrounding well-known or highly publicized archaeological and anthropological "discoveries." • 134 alphabetical entries of terms related to extraordinary archaeological claims, many related to popular frauds, misinterpretations, and misrepresentations of the human past • Contains 50 illustrations, including depictions of the Maya calendar day and month glyphs, ancient astronomical alignments, the sarcophagus lid of the Maya ruler Pacal, and the Ica Stones • Photographs of such monuments and artifacts as the pyramids at Giza, Serpent Mound, Nazca ground drawings, Tucson artifacts, Michigan Relics, and Easter Island Moai bring the topics to life • A comprehensive bibliography and further reading suggestions at the end of

each entry feed further investigation

A modern, comprehensive compilation of more than 7,000 entries covering themes, concepts, and discoveries in archaeology written in nontechnical language and tailored to meet the needs of professionals, students and general readers. The main subject areas include artifacts; branches of archaeology, chronology; culture; features; flora and fauna; geography; geology; language; people; related fields; sites; structures; techniques and methods; terms and theories; and tools.

Spanning ten millennia from earliest civilisation to the Arab conquest this book is the definitive one-volume reference to the ancient lands of the Bible, fusing scientific discovery and literary and religious tradition to produce a deeper understanding of the history of human culture. Here the settings of the world's three major religions are examined, incorporating the most up-to-date archaeological information with the biblical record of the Holy Land, the Encyclopaedia visits the ancient Near East site-by-site, with comprehensive descriptions of hundreds of discoveries as well as providing historical commentary and relevant biblical citations. General articles on subjects such as burial, warfare, cult objects and clothing provide further insight into the material culture and social systems of the biblical period. More than 20

distinguished archaeologists have contributed articles in their areas of expertise complete with details from their own excavations. >

The Indigenous Paleolithic of the Western Hemisphere is a reclaimed history of the deep past of Indigenous people in North and South America during the Paleolithic. Paulette F. C. Steeves mines evidence from archaeology sites and Paleolithic environments, landscapes, and mammalian and human migrations to make the case that people have been in the Western Hemisphere not only just prior to Clovis sites (10,200 years ago) but for more than 60,000 years, and likely more than 100,000 years. Steeves discusses the political history of American anthropology to focus on why pre-Clovis sites have been dismissed by the field for nearly a century. She explores supporting evidence from genetics and linguistic anthropology regarding First Peoples and time frames of early migrations. Additionally, she highlights the work and struggles faced by a small yet vibrant group of American and European archaeologists who have excavated and reported on numerous pre-Clovis archaeology sites. In this first book on Paleolithic archaeology of the Americas written from an Indigenous perspective, *The Indigenous Paleolithic of the Western Hemisphere* includes Indigenous oral traditions, archaeological evidence, and a critical and decolonizing discussion of the

Download Free Encyclopedia Of Global Archaeology

development of archaeology in the Americas.

The Archaeologist's Field Handbook: North American Edition is a hands-on manual that provides step-by-step guidance for archaeological field work. Specially designed for students (both undergraduate and graduate) and avocational archaeologists, this informative guide combines clear and accessible information on doing fieldwork with practical advice on cultural heritage management projects. The Archaeologist's Field Handbook presents firmly grounded (pun intended!), essential, practical archaeological techniques and clearly elucidates the ethical issues facing archaeology today. A wealth of diagrams, photos, maps and checklists show in vivid detail how to design, fund, research, map, record, interpret, photograph, and present archaeological surveys and excavations. The Archaeologist's Field Handbook is an indispensable tool for new and aspiring archaeologists as they venture into the field.

The Encyclopedia opens with a general map of the region and a chronology of periods and dynasties, providing a context for the entries. The first section of the volume then comprises 14 overviews which explore the history and significance of each period. The main body of the text offers more than 300 alphabetically organized entries, written by

Download Free Encyclopedia Of Global Archaeology

some of the most eminent scholars in this field. Areas covered include: artefacts - glass, jewellery, sculpture archaeological practices - dating techniques, representational evidence, textual sources biographies - Howard Carter, Gertrude Caton Thompson, Gaston Maspero buildings - cult temples, private tombs, pyramid complexes geographical features - agriculture, climate, irrigation sites - Abydos, Dakhla Oasis, Thebes social organization - kingship, law, taxation The text is extensively illustrated with over 120 images. Each entry is followed by a selected further reading section which includes foreign language sources to supplement the available works in English.

A sweeping overview of the scholarly information available on archaeology in the Caribbean, tackling the usual questions of colonization, adaptation, and evolution while embracing such newer aspects as geoinformatics and archaeometry.
