exact causes of crises. Financial crises sometimes appear to be driven by “irrational” factors. These include sudden runs on banks, contagion and spillovers among financial markets, limits to arbitrage during times of stress, emergence of asset busts, credit crunches, and fire-sales, and other aspects related to financial turmoil.

[Financial Crises: Explanations, Types, and Implications](#)

There were many causes of the financial crisis, some recent and some longstanding. I would like to focus on three of those causes today: the misperception and mismanagement of risk; the level of interest rates; and the regulation of the financial system.

Financial crisis of 2007–08, severe contraction of liquidity in global financial markets that originated in the United States as a result of the collapse of the U.S. housing market. It precipitated the Great Recession (2007–09), the worst economic downturn in the United States since the Great Depression.

[financial crisis of 2007–08 | Definition, Causes, Effects, ...](#)

The financial crisis was primarily caused by deregulation in the financial industry. That permitted banks to engage in hedge fund trading with derivatives. Banks then demanded more mortgages to support the profitable sale of these derivatives. They created interest-only loans that became affordable to subprime borrowers.
