How to close the gap between strategy and execution Two-thirds of executives say their organizations don't have the capabilities to

support their strategy. In *Strategy That Works*, Paul Leinwand and Cesare Mainardi explain why. They identify conventional business practices that unintentionally create a gap between strategy and execution. And they show how some of the best companies in the world consistently leap ahead of their competitors. Based on new research, the authors reveal five practices for connecting strategy and execution used by highly successful enterprises such as IKEA, Natura, Danaher, Haier, and Lego. These companies:

- Commit to what they do best instead of chasing multiple opportunities
- Build their own unique winning capabilities instead of copying others
- Put their culture to work instead of struggling to change it
- Invest where it matters instead of going lean across the board
- Shape the future instead of reacting to it

Packed with tools you can use for building these five practices into your organization and

supported by in-depth profiles of companies that are known for making their strategy work, this is your guide for reconnecting strategy to execution.

Well known technology executive and angel investor Elad Gil has worked with high growth tech companies like Airbnb, Twitter, Google, Instacart, Coinbase, Stripe, and Square as they've grown from small companies into global brands. Across all of these break-out companies, a set of common patterns has evolved into a repeatable playbook that Gil has codified in High Growth Handbook. Covering key topics including the role of the CEO, managing your board, recruiting and managing an executive team, M&A, IPOs and late stage funding rounds, and interspersed with over a dozen interviews with some of the biggest names in Silicon Valley including Reid Hoffman (LinkedIn),

Marc Andreessen (Andreessen Horowitz), and Aaron Levie (Box), High Growth Handbook presents crystal clear guidance for navigating the most complex challenges that confront leaders and operators in high-growth startups. In what Reid Hoffman, cofounder of LinkedIn and co-author of the #1 NYT bestsellers *The Alliance* and *The Startup of You* calls "a trenchant guide," High Growth Handbook is the playbook for turning a startup into a unicorn.

In a global survey by the Katzenbach Center, 80 percent of respondents believed that their organization must evolve to succeed. But a full quarter of them reported that a change effort at their organization had resulted in no visible results. Why? The fate of any change effort depends on whether and how leaders engage their culture: the self-sustaining patterns of behaving, feeling, thinking, and believing that determine how things are

done in an organization. Culture is implicit rather than explicit, emotional rather than rational—that's what makes it so hard to work with, but that's also what makes it so powerful. For the first time, this book lays out the Katzenbach Center's proven methodology for identifying your culture's three most critical elements: traits, characteristics that are at the heart of people's emotional connection to what they do; keystone behaviors, actions that would lead your company to succeed if they were replicated at a greater scale; and authentic informal leaders, people who have a high degree of “ emotional intuition ” or social connectedness. By leveraging these critical few elements, you can tap into a source of catalytic change within your organization. People will make an emotional, not just a rational, commitment to new initiatives. You will elicit enthusiasm and creativity and build the kind of powerful company that

people recognize for its innate value and effectiveness.

The Growth Drivers is a practical guide to building marketing capabilities. It explains why it is critical that organizations invest in the capabilities needed to excel at customer-centric marketing to drive growth. The authors explain what world-class marketing means in practice and reveal the power of strategic marketing as a dynamic propeller of growth. Each chapter includes a summary, a separate in-depth case study, a range of illustrative real-life examples and some practical tools based on the work of leading practitioners in this pioneering field, as well as relevant diagrams and pictures.

A Wall Street Journal Bestseller Are You a Driver, an Explorer, a Crusader, or a Captain? Many factors shape the success or failure of a new business, whether it ' s a

stand-alone startup or a venture inside a larger corporation. But the most important and least understood of these factors is the personality of the entrepreneur—the particular combination of beliefs and preferences that drives his or her motivation, decision making, and leadership style. And your builder personality is the one resource you can directly control in growing a business that wins. Simply put, who you are shapes how you build for growth. Built for Growth decodes the interplay between builder personality and new business success. Using a patented analytic methodology, authors Chris Kuenne and John Danner discovered four distinct types of highly successful entrepreneurial personalities—the Driver, the Explorer, the Crusader, and the Captain. Each is motivated, makes decisions, manages, and leads their businesses differently. Kuenne and Danner blend pioneering research and

exclusive personal interviews to illustrate how each type handles the five dynamic challenges in building a business of lasting value: converting ideas into products, galvanizing individual talent for collaborative impact, transforming buyers into partners, aligning financial and other supporters, and scaling the business. With assessments and tools, including a brief Builder Personality quiz and in-depth profiles of each builder type, *Built for Growth* is the ultimate guide for how to play to your strengths, complement and compensate for your gaps, and build a successful business—from startup to scale-up. Its vivid stories and practical advice show how you can unlock the potential of your builder personality to shape your business, your team, and your ability to win in the marketplace. Do you want to achieve startup speed at
enterprise scale? Growth. It's what every
company strives for. But it's become more
and more elusive as companies struggle to
hit their projected growth rates in an
increasingly competitive market. While zero-
based budgeting (ZBB) has been wielded for

cutting costs, it falls short when it comes to spurring growth. But a zero-based mindset (ZBx) does that and more. ZBx facilitates forensic oversight into resource allocation that funnels savings back into growth initiatives and encourages new sources of innovation. The Big Zero shows how a ZBx approach focuses on agility over austerity, visibility over guesswork and the future over the past to fuel growth and competitiveness.
