warmer shores and on comparative work in laboratories and museums. Originally published in 1975. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

that are adaptable for use by tribal colleges and community colleges. It was created for a two-semester General, Organic, and Biochemistry course sequence at Nebraska's two tribal colleges over a period of four years. While the authors see chemistry everywhere, we developed these connections to tribal community topics to help students to see the chemistry of everyday life and to find intellectual satisfaction and enjoyment while doing so. The labs can be performed by students alone or in pairs and will require about 2.5 hours to complete if the reagents and materials are ready. All labs have background information, community connections, the lab protocols and procedures, and suggestions for the lab report.

Written by two practising clinicians, this book is designed as a guide for those who work with children. In clear, simple language it focuses upon some of the most common, yet often incapacitating difficulties which are frequently encountered by young children and adolescents. After introducing and discussing different forms of therapy and treatment used in clinical work with children, the book provides a series of chapters, each dealing with a specific difficulty. Drawing upon recent research findings, and employing detailed case illustrations, it seeks to help the reader to understand the nature of each problem and offers a guide as to how the child in difficulty can best be helped. The book is
