~~What is Heroku?
A Simple
Explanation for
Non-Techies~~

We define a diameter, chord and arc of a circle as follows: 1. The distance across a circle through the centre is called the

diameter. Thus, the diameter of a circle is twice as long as the radius. † A chord of a circle is a line that connects two points on a circle. † An arc is a part of a circle.

Draw the circle
using the
compass. Put the
compass point
right where you
want the center
of the circle to
be. Draw more
