assumptions that frame this area of study. In doing so, it aims to make visible the challenges of teaching sexuality education in South African schools, while demonstrating its potential for reshaping our conceptions of the social and cultural representations thereof. Although the book is largely situated in experiences and perspectives within the South African context, it is hoped that the questions raised, reflections, analyses and arguments will contribute to thinking about sexuality education in diverse contexts, in particular more developing contexts.

ED-L2L, Learning to Live in the Knowledge Society, is one of the co-located conferences of the 20th World Computer Congress (WCC2008). The event is organized under the auspices of IFIP (International Federation for Information Processing) and is to be held in Milan from 7th to 10th September 2008. ED-L2L is devoted to themes related to ICT for education in the knowledge society. It provides an international forum for professionals from all continents to discuss research and practice in ICT and education. The event brings together educators,

researchers, policy makers, curriculum designers, teacher educators, members of academia, teachers and content producers. ED-L2L is organised by the IFIP Technical Committee 3, Education, with the support of the Institute for Educational Technology, part of the National Research Council of Italy. The Institute is devoted to the study of educational innovation brought about through the use of ICT. Submissions to ED-L2L are published in this conference book. The published papers are devoted to the published conference themes: Developing digital literacy for the knowledge society: information problem solving, creating, capturing and transferring knowledge, commitment to lifelong learning Teaching and learning in the knowledge society, playful and fun learning at home and in the school New models, processes and systems for formal and informal learning environments and organisations Developing a collective intelligence, learning together and sharing knowledge ICT issues in education - ethics, equality, inclusion and parental role Educating ICT professionals for the global knowledge society Managing the transition to the knowledge society

Global Directions in Inclusive Education pushes the conceptual boundaries of 'inclusive education' and explores new ways to research and envision inclusion and diversity in education for all children.

This pioneering book problematizes 'inclusive education' as a global currency, as another form of deficit-thinking, and as a universal application. The expert team of international contributors argue that much of the field of inclusive education needs a reinvigoration of new ideas, critical introspection, and ways of knowing that can overcome the well-worn deficit paths of inclusive education study, namely: 'barriers' to inclusion, teacher attitudes, policy-practice gaps, lack of resources, and lack of teacher training. Seeking diverse ways forward that represent new visions and innovations from around the world, this text features voices and ideas from both early career and established scholars, to enliven debate and promote a more positive and productive dialogue. *Global Directions in Inclusive Education* is ideal for students, researchers, and scholars of inclusive education; development practitioners seeking new ideas; and practitioners seeking to gain a deeper and more global understanding of inclusive education both in theory and in practice.
