Temporary Traffic Control Policies

Temporary Traffic Control Design Guidelines 3 Prior to the installation of any reduction in the posted speed limit, a SPEED REDUCED AHEAD (W3/5aAZ) or symbolic Reduced Speed Limit Ahead (W3/5) sign shall be installed. If the posted speed limit is reduced, a regulatory speed limit sign indicating the existing speed limit should be placed approximately 500 feet beyond the end of the TTC zone unless there is existing speed limit signing in place within 1,000 feet of the end of the work zones.

Temporary Traffic Control Design Guidelines

Temporary Traffic Control. Roadway crashes are a result of three primary contributing factors: human behavior, the roadway itself, and the vehicle. A combination of any or all of these factors may lead to a crash or increase the severity of a crash. However, research proves that the greatest potential to improve roadway safety is by a comprehensive approach that includes enforcement, education, emergency response, and engineering infrastructure safety countermeasures.
