When it comes to their personal transportation, today's youth have shunned the large, heavy performance cars of their parents' generation and instead embraced what has become known as the "sport compact"—smaller, lightweight, modern sports cars of predominantly Japanese manufacture. These cars respond well to performance modifications due to their light weight and technology-laden, high-revving engines. And by far, the most sought-after and modified cars are the Hondas and Accuras of the mid-'80s to the present. An extremely popular method of improving vehicle performance is a process known as engine swapping. Engine swapping consists of removing a more powerful engine from a better-equipped or more modern vehicle and installing it into your own. It is one of the most efficient and affordable methods of improving your vehicle's performance. This book covers in detail all the most popular performance swaps for Honda Civic, Accord, and Prelude as well as the Acura Integra. It includes vital information on electrics, fit, and drivetrain compatibility, design considerations, step-by-step instruction, and costs. This book is must-have for the Honda enthusiast.

"Walking a Tightrope plays an important role in the dynamic historical process of ongoing change in the representation of Aboriginal peoples. It locates and examines the multiplicity and distinctiveness of Aboriginal voices and their representations, both as they portray themselves and as others have characterized them. In addition to exploring perspectives and approaches to the representation of Aboriginal peoples, it also looks at Native notions of time (history), land, cultures, identities, and literacies. Until these are understood by non-Aboriginals, Aboriginal people will continue to be misrepresented - both as individuals and as groups."--BOOK JACKET.
