Presents major theories for systems addressed in generalist practice. This text is part of the Connecting Core Competencies Series. Human Behavior and the Social Environment: Social Systems Theory provides an expanded treatment of systems theory, and applies the theory to common social work concerns. The text links systems to social roles, and provides a framework for critical assessment of the theories from the systems/roles perspective. It assesses the strengths and weaknesses of each theory with regard to the value of each theory for social work practice. Social systems theory remains the focus of this text. In addition theories are identified as grand theories, middle range theories, or focal theories, to assist the student in understanding the scope and application of theories across system sizes. This text breaks new ground in using role theory as a middle range theory to address common features of human systems at a level that is more intuitive for

students, and yet detailed enough to stimulate independent thinking. The text addresses the standard repertoire of theories, and in addition presents application of the theories to social issues such as violence and addiction. A better teaching and learning experience This program will provide a better teaching and learning experience – for you and your students. Here ' s how: Improve Critical Thinking – Links systems processes and concepts to role theory as a middle range perspective. Engage Students – Relates social systems concepts to the contexts of generalist social work practice Explore Current Issues – Provides an integrative perspective for the diverse theories used by social workers Apply CSWE Core Competencies – The text integrates the 2008 CSWE EPAS, with critical thinking questions and practice tests to assess student understanding and development of competency. Human Behavior and the Social Environment: A Macro, National, and International Perspective is a textbook for one of the primary courses in the social work curriculum titled Human Behavior in the Social Environment. The course is offered usually over two semesters, with one focusing on micro issues (how the individual develops in relation to their social environment on an individual, family, and group level). The second section of the course typically focuses on macro issues pertaining to how an individual is shaped by their social

environment by macro issues including social institutions, community, and the government. This book is intended for the second sequence of the course. It takes a unique approach by incorporating international issues of globalization, which has been an emerging issue in social work. Although it takes this unique perspective, it still covers the basics of macro social work on a national level. Other important areas that are not well represented in competing texts includes coverage of rural issues, the impact of hurricane Katrina on social and community resources, human rights and social justice, the increasing impact of increasing rates of incarceration, and a special section focusing on crisis theory. This book has a number of key selling points. They include: A broad national and international perspective A timely approach that examines issues such as rural communities, the impact of disaster on communities, and increasing incarceration rates Provides special

A timely revision in this global age, *Human Behavior and the Social Environment, Macro Level* develops a sophisticated and original view of the cultural, global, spiritual, and natural worlds that people inhabit, and the impact of these worlds on human behavior. Its major new theme, sustainability, emerges as a key characteristic of contemporary practice. What is sustainable social work? What are the characteristics of a sustainable community? How is the present exploitation of environmental resources unsustainable for future generations? Following the greatest economic upheaval since the Great Depression, how can we envision a sustainable economy that will benefit all the

people, not only the wealthy few? Human behavior results from biological, psychological, socio-economic, and cultural forces, but the mental health field has placed the most emphasis on intrapsychic factors to the near exclusion of socio-economic and cultural considerations. This significant collaboration seeks to correct this omission by helping students recognize patterns in the family, culture, and value systems in order to create safe and sustainable environments for their future clients. The emphasis on sustainable and unsustainable social welfare programs is geared to helping readers engage in advocacy for social justice. * Integrates up-to-date research findings, models, and government statistics * Enhanced discussions of theory, group dynamics, family, community, and the environment * Theoretical concepts and practice implications in each chapter * Highlights the importance of the natural environment and ecology--the "community

Introductory thesis on the premise that social work is a social profession, and that it is the use of the social relationship as the medium for helping that distinguishes social work from other professions. This social relationship is then modelled as a social system.

It also takes into account the expected and unexpected stresses, challenges, and life tasks that can influence development within social environments."--BOOK JACKET.

This lively, comprehensive introduction to human behavior in the social environment offers a multidimensional approach to the topic,

with discussion of integrative practice, theory, treatment, and services as well as matters pertaining to diversity addressed throughout the text. The text provides solid coverage of foundation knowledge, integrates the biopsychosocial dimensions for assessing social functioning, and offers case studies to illuminate the applied aspects of the content. Furthermore, as part of the Brooks/Cole Empowerment Series, the fifth edition thoroughly integrates the core competencies and recommended practice behaviors outlined in the 2008 Educational Policy and Accreditation Standards (EPAS) set by the Council on Social Work Education (CSWE), thus helping students connect foundation knowledge with specific practice concerns. Study tables and concept maps (for each discussion of behavior in the development chapters) clarify major phases of biopsychosocial development across the life span. This framework gives students a concrete tool for
