The blockchain, on the other hand, is a decentralised public digital ledger. Decentralised means that no one owns the ledger and transactions are done directly between two parties (peer-to-peer) instead of going through a middleman (3rd party) like banks or PayPal.

What is an ICO? Blockchain Initial Coin Offering or ...

Simply put, it's a way for an individual or company to raise money for a project by selling crypto tokens to investors. This is similar in some ways to an IPO, or an initial public offering, where a company sells shares (stocks) to the investing public in order to raise money for their business.

What is an ICO? The Simple Explanation!

The Basics: An Initial Coin Offering or ICO or token sale is a crowdsale system which blockchain startups use to fund their projects. An investor is offered a digital token in exchange f or his investment usually more liquid cryptocurrencies like Bitcoin or Ethereum. The investor can trade their tokens at the end of the ICO on a cryptocurrency exchange instead of waiting years.

What is an ICO? The Easy Version > Satoshi Library

An ICO is an extremely laborious event for the blockchain, at least the way it is designed right now. The fact remains that blockchains are simply not scalable enough to take up heavy duty activity. The 0 million Status ICO clogged up the ethereum blockchain so badly that a lot of people simply weren't able to participate because their transactions didn't come through.

Blockchain is an online ledger of all transactions that's available for anyone to view and copy, but that no one individual controls. Instead, it lives on many computers, where it is constantly updating itself.

Bitcoin, blockchain and ICOs: Confused? We explain ...

Immutability is a state of blockchain, in which the transaction can under no circumstances be canceled, reverted, or changed by any member of the network. In other words, no one can do anything about the transaction, and everything that happened in this transaction will forever remain in the blockchain.

Immutability of blockchain transactions simply explained

Security Token Offerings Explained Simply. Posted on January 23, 2019. At a recent meeting of the Blockchain Investors Supergroup, we had a very special guest: Richard Kastelein —or as I call him, “The Man Who Launched 100 ICOs.”. As the publisher of Blockchain News, Richard was one of the first to learn about Initial Coin Offerings, and he quickly became a master of this new form of fundraising.
