What Jabari seems to be implying in the Jabari Authentic Jamaican Dictionary of the Jamic Language is word + sound = power, which demonstrates that words tend to be powerful enough when spoken to have a mental hold on an individual and if one has been called a fool long enough, then that person will eventually begin to act like one. To state the point more clearly, Cogito, Ergo Sum (I think, therefore I am).

This book is the first systematic cross-disciplinary survey on the use of Jamaican English in Ethiopia, describing the dynamics of language acquisition in a multi-lectal and multicultural context. It is the result of over eight years' worth of research conducted in both Jamaica and Africa, and is a recognition of the trans-cultural influence of the "Repatriation Movement" and other diasporic movements. The method and materials adopted in this book point to a constant spread and diffusion of Jamaican culture in Ethiopia. This is reinforced by the universalistic appeal of Rastafarianism and Reggae music and their ability to transcend borders. The data gathered here focus on how an Anglophone-based Creole has developed new speech-forms and has been hybridized and cross-fertilized in contact situations and by new media sources. The book focuses on the use of Jamaican English in four particular domains: namely, school, street, family, and the music studio. Its findings are drawn from an exceptional range of sources, such as field-work and video-recordings, interviews, web-mediated communication, artistic performance and relevant transcriptions. These sources highlight five topics of relevance—language acquisition and choice; English and Jamaican speech forms; hegemonic and minority groups, Rastafarian culture and Reggae music—which are explored in further detail throughout the book. These salient features, in turn, interface with the dynamics of influencing factors, reinforcing circumstances, significance and change. The book represents a journey to the "extreme-outer circle" of English language use, following a circular route away from Africa and back again, with all the languages used (and lost) along the slavery route and inside the plantation complex developing into creolized speech forms and Creoles. Such language use is now making its way back to Africa, with all the incendiary creativity of

Slavery, Geography and Empire in Nineteenth-Century Marine Landscapes of Montreal and Jamaica is among the first Slavery Studies books - and the first in Art History - to juxtapose temperate and tropical slavery. Charmaine A. Nelson explores the central role of geography and its racialized representation as landscape art in imperial conquest. One could easily assume that nineteenth-century Montreal and Jamaica were worlds apart, but through her astute examination of marine landscape art, the author re-connects these two significant British island colonies, sites of colonial ports with profound economic and military value. Through an analysis of prints, illustrated travel books, and maps, the author exposes the fallacy of their disconnection, arguing instead that the separation of these colonies was a retroactive fabrication designed in part to rid Canada of its deeply colonial history as an integral part of Britain's global trading network which enriched the motherland through extensive trade in crops produced by enslaved workers on tropical plantations. The first study to explore James Hakewill's Jamaican landscapes and William Clark's Antiguan genre studies in depth, it also examines the Montreal landscapes of artists including Thomas Davies, Robert Sproule, George Heriot and James Duncan. Breaking new ground, Nelson reveals how gender and race mediated the aesthetic and scientific access of such - mainly white, male - artists. She analyzes this moment of deep political crisis for British slave owners (between the end of the slave trade in 1807 and complete abolition in 1833) who employed visual culture to imagine spaces free of conflict and to alleviate their pervasive anxiety about slave resistance. Nelson explores how vision and cartographic knowledge translated into authority, which allowed colonizers to 'civilize' the terrains of the so-called New World, while belying the oppression of slavery and indigenous displacement.
