More than 200 pages and 150 illustrations (photographs, drawings and diagrams) This book addresses in a practical and illustrated manner, all the aspects necessary to cultivate medical and recreational marijuana indoors using soil, in the most sustainable way possible and using LED lights. This is a practical book written to allow anyone to grow indoors according to their needs, always trying to be more energy efficient and more responsible to the environment. We cover a wide range of topics: - Adequate choice of LED lights and systems of extraction and intraction. - Step-by-step assembly of the grow tent. - Recommendations and practical examples during all stages of growing. - Organic and biological treatment of pests and deficiencies. - Use of electronic devices to monitor the conditions of our grow tent and introduce mechanisms of alert and safety against fires and unauthorized accesses. - Designs to be printed in 3D, with which we will be able to manufacture our own parts, adapters, holders and pots. We have designed a special transplant pot that we make available to all our readers, which minimizes the stress associated with transplants, contributing to a healthier and stronger crop. This book can be used as a reference manual in the case that we are growing with another type of lighting. In addition, through our website weedomancer.com/en, we will offer to all our readers a direct channel of communication with the
