MCSD Analyzing Requirements and

Defining .NET Solution Architectures Exam Cram 2 (Exam 70-300) helps you pass the 70-300 exam, which is a core exam in the MCSD .NET track and measures the ability to analyze requirements and define Microsoft .NET solution architectures. This exam is extremely tricky, widely considered

Page 14 of 45

the most difficult of any MCSD exams because of its emphasis on case studies as well as its demand that candidates have at least two years of hands-on experience.

MCSD Analyzing Requirements and
Defining .NET Solution ...

Featuring authoritative coverage of the Microsoft Solutions Foundation strategy, this course helps build competency in six critical skill areas defined by the MCSD program analyzing requirements for performance, security, maintainability, and extensibility; defining technical

architecture; developing the conceptual and logical design; creating data models; designing a user interface and user services; and deriving the physical design.

Analyzing Requirements and Defining Solution Architectures ...

Gather and analyze business and user requirements ; Transform requirements into functional and technical specifications ; Develop strategies for deployment, security, operations, and testing ; Create a conceptual model of data requirements ; Define the technical
