Fingering Charts and Trill Charts - Documents and Forms

A properly executed fast trill is an amazing effect but like all fast playing you must learn to play it beautifully slowly then gradually increase its speed but maintaining its quality. To this end, there is little merit in moving your fingers around, for example the first finger of your left hand on the 1st valve whilst the first finger of your right hand trills on the 3rd valve.

First Octave - Trill Fingering Chart for ... - Piccolo oboe

Breathing is the most fundamental part to playing the oboe. In order to produce a quality sound on the oboe, the player must use a steady consistent airstream. Think of your windpipe like a hose; the air needs to flow straight through it with constant pressure and without interruption until it hits the reed.

The Oboe for Dummies

First and foremost, in choosing an oboe, the musician's age and skill level should be the very first factor that needs to be addressed. What kind of use the instrument will be put through is also important. If the oboe is for a school, consulting with the band teacher is a good idea.

Oboe Buying Guide & Comparison Chart | Woodwind ...

The oboe can produce notes up to C7, though standard orchestral repertoire requires up to only A6, and most frequently up to only F6. Contemporary band or wind ensemble music, however, increasingly asks for high and very technical playing, necessitating the need to know these notes as younger players.

Extended Techniques - Oboehelp

area of an oboe or English horn is the area between the trill tone holes in the upper joint. Often a tiny crack can develop almost unseen, which can seriously hamper an instrument's playing ability. A good test for air tightness is to cover all the tone holes in the top joint and insert a rub-ber stopper in the bottom of the upper joint. Try ...

The primary purpose in presenting this method for publication was to make available a book that did not progress too rapidly for beginners, one that taught proper oboe fingerings, and one that presented logical progression of rhythmical problems. Includes fingering chart for the conservatory system oboe.

This book introduces music education majors to basic instrumental pedagogy for the instruments and ensembles most commonly found in the elementary and secondary curricula. This text focuses on the core competencies required for teacher certification in instrumental music. The first section of the book focuses on essential issues for a successful instrumental program: objectives, assessment and evaluation, motivation, administrative tasks, and recruiting and scheduling (including block scheduling). The second section devotes a chapter to each wind instrument plus percussion and strings, and includes troubleshooting checklists for each instrument. The third section focuses on rehearsal techniques from the first day through high school.

WIND INSTRUMENTS. Oboe Art and Method is a complete and comprehensive guide to oboe technique. Author Martin Schuring, a veteran oboe performer and instructor, describes in detail all of the basic techniques of playing (breathing, embouchure, finger technique, articulation) and reed making, with expert tips and step-by-step instructions for how best to perform each of these tasks with grace and technical efficiency. Schuring's descriptions are straightforward and articulate, designed to encourage students to focus on the basic techniques of tone production as a springboard for more nuanced artistic development. Key sections address long-tone and scale practice in ways that go beyond advice most teachers will give their pupils, and the author's focus on embouchure development cultivates supported breathing and blowing to help provide the best foundation for aspiring oboists. A reliable source of practical and time-tested advice.

In today's digital age, learning and creating music has never been so easy and affordable. Anyone can enhance their musical knowledge, skills, and creativity with the multitude of music apps available. However, sifting through thousands of music apps in the Apple App Store and Google Play can be a daunting task for any musician or music instructor. But not anymore! Having spent countless hours researching the most interesting useful, educational, fun, and easy-to-use music apps, Elizabeth C. Axford in *Music Apps for Musicians and Music Teachers* surveys the landscape of music-related apps for both iOS and Android mobile devices, including tablets and smartphones. *Music Apps for Musicians and Music Teachers* lists hundreds of music-related apps organized by category, including singing, musical instruments, music theory and composition, songwriting, improvisation, recording, evaluating music performances, listening to music, music history and literature, music appreciation, and more. App developers are listed with each app, including links to their websites for updates and support. The book sections and chapters align with the newly revised National Standards for Music Education released in 2014 by the National Association for Music Education. Suggested activities for educators are provided, as well as key terms and a bibliography. *Music Apps for Musicians and Music Teachers* is for anyone interested in music, whether hobbyist or professional. It enhances the ability to learn on the go by offering musicians, music students, and music instructors a list of the most useful music apps available.

Following on the heels of his *Conducting and Rehearsing the Instrumental Music Ensemble*, John F. Colson takes students to the next level in conducting practice with *Rehearsing: Critical Connections for the Instrumental Music Conductor*. Colson draws together the critical connections for those seeking to become fully capable and self-assured instrumental music conductors. As he argues, too often conductor training programs treat the problems and challenges of the rehearsal—perhaps the single most critical element in any effort to achieve competency as a conductor—as secondary. Colson supplies the missing link for conductors looking for advice that allows them to complete their training for reaching complete competency as a conductor. He demonstrates throughout the specific connections that the advanced conductor must know and regularly employ—connections that few, if any, other works on the art of conducting address or bring together. One connection, for example, illustrates the joining of music imagery, inner singing, and conducting technique to score study. Throughout, these connections describe the nitty-gritty of what it really takes to stand up in front of an instrumental music ensemble and successfully rehearse in order to achieve its highest performance level. Also, Colson argues and demonstrates the pitfalls of the commonly mistaken assumption among instrumental music conductors that score study alone is sufficient to prepare them for the rehearsal process. This grave error is regularly belied by the fact that a number of other steps precede the actual rehearsal process, from the use of instrumental pedagogy during the rehearsal process to teaching through performance concepts. Colson's work addresses the entire rehearsing process thoroughly and authoritatively.
