The problem-solving process can be described as a

journey from meeting a problem for the first time to finding a solution, communicating it and evaluating the route. There are many models of the problem-solving process but they all have a similar structure. One model is given below. Although implying a linear process from comprehension through to evaluation, the model is more of a flow backward and forward, revisiting and revising on the problem-solving journey.

The problem-solving process We can helpfully spend time with learners concentrating on each of these stages explicitly, in turn, as they learn to become confident problem solvers. The third stage, 'Digging deeper' (in red above), takes place once the problem has been thoroughly explored and some solutions may have been found.

Problem Solving Reasoning

Problem-solving skills help you determine why an issue is happening and how to resolve that issue. It's one of the key skills that employers seek in job applicants. Problem-solving starts with identifying the issue, coming up with solutions, implementing those solutions, and evaluating their effectiveness.
