Adaptive components are an  
adaptation of the pattern-  
based curtain panel. For  
example, adaptive components  
could be used in repeating  
systems generated by  
arraying multiple components  
that conform to user-defined

Feature Wall Using Revit Adaptive Components and Repeat Pattern Tool. Revit often gets a bad wrap for not being a "design" tool and can be seen as clunky at best for creating parametric looking architecture. Revit Adaptive Component Feature Wall. In this free Revit training, we look at how to use this little nugget called the Revit "Repeat" tool in a "way faster Wednesday" video to place multiple Revit adaptive components at the same time.

The great thing about  
adaptive modeling is being  
able to create 3D geometry  
that is able to flex and  
follow the form of complex  
surfaces and curves. In this  
video link, you'll learn how  
to work with draw tools and  
reference lines to create  
flexible 3D geometry for  
your complex forms.
