The Book of R is a comprehensive, beginner-friendly guide to R, the world ' s most popular programming language for statistical analysis. Even if you have no programming experience and little more than a grounding in the basics of mathematics, you ' ll find everything you need to begin using R effectively for statistical analysis. You ' ll start with the basics, like how to handle data and write simple programs, before moving on to more advanced topics, like producing statistical summaries of your data and performing statistical tests and modeling. You ' ll even learn how to create impressive data visualizations with R ' s basic graphics tools and contributed packages, like ggplot2 and ggvis, as well as interactive 3D visualizations using the rgl package. Dozens of hands-on exercises (with downloadable solutions) take you from theory to practice, as you learn: – The fundamentals of programming in R, including how to write data frames, create functions, and use variables, statements, and loops – Statistical concepts like exploratory data analysis, probabilities, hypothesis tests, and regression modelling, and how to execute them in R – How to access R ' s thousands of functions, libraries, and data sets – How to draw valid and useful conclusions from your data – How to create publication-quality graphics of your results Combining detailed explanations with real-world examples and exercises, this book will provide you with a solid understanding of both statistics and the depth of R ' s functionality. Make The Book of R your doorway into the growing world of data analysis.

'The Delights of Learning Turkish' is a self-study course book that takes the learner from the beginner level to the intermediate level in Turkish. It is designed for English speakers, targeting adult and young adult learners; especially for those planning to settle and live in Turkey or visiting Turkey for business or pleasure. It is a comprehensive, explanatory approach to Turkish language teaching how to construct and use the language both in formal and colloquial forms with dialogues, examples, grammar points, vocabulary and exercises. It shows the grammatical structures in detail with examples, which enables the learners to make their own sentences instead of depending on off-the-shelf phrases. In the book, you can also find general information about the Turkish alphabet and Turkish language as well as notes on Turkish culture in daily life. Covering so many language points, this book is also a grammar reference that targets a wide range of audience including advanced learners. At the end of the book, you will find the keys to the exercises. There are also Turkish - English and English - Turkish glossary sections as well as Turkish proverbs and idioms added to the book with explanations.

Challenge and inspire your teenage learners to think beyond language. Think is a vibrant course designed to engage teenage learners and make them think. As well as building students' language skills, it offers a holistic approach to learning: developing their thinking skills, encouraging them to reflect on values and building their self-confidence. Topics are chosen to appeal to and challenge teenagers, firing their imagination and ensuring effective learning. Exam-style exercises and tips help students prepare for Cambridge English Key, Preliminary, First and Advanced. Informed by the Cambridge English Corpus, the course reflects real language usage and 'Get it right' sections help students avoid common mistakes.

The hidden costs of artificial intelligence, from natural resources and labor to privacy and freedom What happens when artificial intelligence saturates political life and depletes the planet? How is AI shaping our understanding of ourselves and our societies? In this book Kate Crawford reveals how this planetary network is fueling a shift toward undemocratic governance and increased inequality. Drawing on more than a decade of research, award-winning science, and technology, Crawford reveals how AI is a technology of extraction: from the energy and minerals needed to build and sustain its infrastructure, to the exploited workers behind "automated" services, to the data AI collects from us. Rather than taking a narrow focus on code and algorithms, Crawford offers us a political and a material perspective on what it takes to make artificial intelligence and where it goes wrong. While technical systems present a veneer of objectivity, they are always systems of power. This is an urgent account of what is at stake as technology companies use artificial intelligence to reshape the world.

GoGetter is a new multi-level secondary course designed to inspire 21st Century learners and help them achieve their language goals. Exam practice is seamlessly integrated and innovative multimedia includes authentic BBC content which students can access in the classroom or at home.
