What makes places like Silicon Valley tick? Can we replicate that magic in other places? Discover the answers in this groundbreaking book from two of the world's leading experts at the intersection of venture capital and global development. Victor W. Hwang and Greg Horowitz propose a radical new theory to explain the nature of innovation ecosystems: human networks that generate extraordinary creativity and output. They argue that free market thinking fails to consider the impact of human nature on the innovation process. This ambitious work challenges the basic assumptions that economists have held for over a century. The authors argue that innovation ecosystems - what they call Rainforests - can only thrive when certain cultural behaviors unlock human potential. Their theory of the Rainforest is influenced by several breakthrough ideas in academia, including insights on sociobiology from Harvard, economic transactions from the University of Chicago, and design theory from Stanford. With an unorthodox and entertaining narrative, the book reveals the mysterious mechanisms of Rainforests. Furthermore, the authors provide practical tools for readers to design, build, and sustain new innovation communities. The Rainforest will transform the way you think about technology, business, and leadership.

Discover the amazing animals that live in the lush rainforest, with this gorgeously illustrated book of nature's hidden habitats. By simply holding the book up to the light, or shining a light behind each page, young children will be able to discover the animals and plants that live in and around a kapok tree, from the colourful parrots in the canopy, to the sleek jaguar on the forest floor. The innovative see-through feature fulfils a similar function to lift-the-flaps books, but has the added interactive dimension of the child being able to see both the surface and the hidden picture at the same time.

Swing into this rainforest adventure in this action-packed conservation themed instalment of DK eBooks' new educational fiction series for children. Meet the Secret Explorers - a band of brainiac kids from all around the world. Everyone in this diverse group of young experts has a speciality, from outer space to dinosaurs, and each story follows a character who gets chosen for a "secret exploration". In this fun, fact-filled children's ebook, we join rainforest expert Ollie on an exciting mission to rescue a lost baby orangutan in the steamy rainforest of Borneo. Joined by engineering expert Kiki, they set out in a glider to search for the friendly ape. Along the way, they encounter greedy plantation owners who are plotting to destroy the forest to expand a palm oil plantation, and learn about the threat to animals and plants due to deforestation. Kids will love turning the pages to find out if the Secret Explorers manage to succeed in their mission! Swing into action! With a thrilling narrative that keeps kids engaged, The Secret Explorers and the Rainforest Rangers book by SJ King is the perfect gift for children who are into all things rainforest. It's written for children aged 7-9 years, with lots of information on animal and plant life, to give them a thrilling introduction to nature. At the end of the ebook, you'll find "Ollie's Mission Notes" which is a summary of all the scientific facts and discoveries made throughout the story. With fun illustrations, quizzes, and a vocabulary list, the educational value of this book is outstanding and great for a classroom read! Get Ready to join the Secret Explorers Club The Secret Explorers series is a reminder to kids that they are limited only by their imagination and teaches them that learning is fun! But most of all, these educational ebooks encourage children to believe that they can become experts in something they love. This edge-of-your-seat adventure ebook includes: Fun facts and illustrations about animals and plants found in the rainforest of Borneo Simple and engaging explanations on how deforestation is altering our planet's biodiversity Quizzes, mission notes, and a glossary of words with definitions Complete the series Each ebook in the series combines exciting adventures with real-life facts related to the Secret Explorers' latest fictional mission. Don't miss out on more secret explorations! Take on an out-of-this-world mission in The Secret Explorers and the Comet Collision. Travel back in time to save a dinosaur egg from destruction in The Secret Explorers and the Jurassic Rescue. Set out on a journey to stop the Cairo Museum from closing down in The Secret Explorers and the Tomb Robbers. Then take a trip up an erupting volcano in The Secret Explorers and the Smoking Volcano.

Profiles rain forest plants with details on medicinal properties, history of use, current uses, methods of preparation, and natural chemicals

Can Silicon Valley 's culture inspire innovation in your organization? Could understanding its rules be transformational? Would a blueprint help you construct an ecosystem of innovation? Find out through The Rainforest Blueprint: How to Design Your Own Silicon Valley. It 's a practical guide for putting the lessons learned from Silicon Valley to work in businesses, organizations, and communities around the world. It 's the latest development in the Rainforest phenomenon that is now spawning innovation ecosystems on five continents. The Rainforest Blueprint is a do-it-yourself sequel to the 2012 book The Rainforest: The Secret to Building the Next Silicon Valley – the groundbreaking work by Victor W. Hwang and Greg Horowitz that explains the nature of innovation ecosystems like Silicon Valley: human networks that generate extraordinary creativity and output. They make the case that such ecosystems – which they call Rainforests – can only thrive when certain cultural behaviors unlock human potential, and they reveal the mysterious mechanisms of Rainforests. The Rainforest Blueprint by Victor Hwang, who is a Silicon Valley entrepreneur and co-founder of T2 Venture Capital, is designed for a different audience than the original Rainforest. Where the earlier book provides the theoretical understanding of how Rainforests work and the rules by which they operate, the Blueprint offers practical steps for putting those theories and rules to work in businesses, organizations, and communities. Sixty pages long – as compared to the earlier book 's nearly 300 pages – The Blueprint provides – with stunning visuals and handy tools – the shared background needed for individuals to create together an innovation ecosystem in whatever setting they choose. It provides a common entry point into the world of innovation ecosystems – a shared starting point and a way to begin to create innovations that can be truly transformational.

NSTA/CBC Best STEM Book This picture book biography tells the story of Meg Lowman, a groundbreaking female scientist called a "real life Lorax" by National Geographic, who was determined to investigate the marvelous, undiscovered world of the rainforest treetops. Meg Lowman was always fascinated by the natural world above her head — the colors, the branches, and, most of all, the leaves and mysterious organisms living there. Meg set out to climb up and investigate the rain forest tree canopies — and to be the first scientist to do so. But she encountered challenge after challenge. Male teachers would not let her into their classrooms, the high canopy was difficult to get to, and worst of all, people were logging and clearing the forests. Meg never gave up or gave in. She studied, invented, and persevered, not only creating a future for herself as a scientist, but making sure that the rainforests had a future as well. Working closely with Meg Lowman, author Heather Lang and artist Jana Christy beautifully capture Meg's world in the treetops. "Meg Lowman or 'Canopy Meg' is a true hero, a courageous explorer, who made amazing discoveries high in the forest canopy. The Leaf Detective captures the magic of that little-known world with its clear, informative text and fabulous illustrations. Young readers everywhere will be fascinated and inspired to learn more about nature." —Jane Goodall, PhD, DBE, Founder of the Jane Goodall Institute and Pioneer of Peace " Margaret Lowman is a pioneer scientist in a discipline that demands exceptional imagination, courage, and physical rigor. But of equal importance, she has created an extraordinarily important branch of environmental and conservation research. Heather Lang and Jana Christy, in this charming introduction, have invited us to climb on up and visit her. " —Edward O. Wilson, Pulitzer Prize winner and Professor Emeritus, Harvard University

A Powerful Rainforest Medicinal Herb with Many Health Benefits

At one time rainforests covered about 14% of the earth's surface; now they're reduced to just 6%. As home to some of the most diverse plant and animal species ever known, this decline has grave implications for both man and animal kingdoms. A is for Anaconda: A Rainforest Alphabet explores the world's rainforests as it explains their important role and showcases their wonders. Nature writer Anthony Fredericks gives an A-Z tour of the many facets and fascinating facts of these tropical environments. Exotic inhabitants including the basilisk lizard and kinkajou are highlighted, along with explanations of forest structure such as understorey and canopy. In A is for Anaconda young readers will meet the many endangered plant and animal species, understand the progression of a food web, and appreciate why the rainforest has been called the "world's medicine chest." Anthony D. (Tony) Fredericks is a frequent traveler to the rainforests of Hawaii and Central America. He is the author of many nature and animal books for children, including several award-winning titles. When not visiting classrooms across the country, Tony teaches education courses at York College in York, PA. Laura Regan is nationally known for her rich, contemporary style of painting and her many award-winning children's books featuring exotic flora and fauna. Her artwork has been used to raise funds for many wildlife organizations. Laura lives in the Bay Area in California.

A look at the living things that call the rain forest their home.
