Transformations in Self Psychology highlights the manner in which contemporary self psychology has become, in the words of series editor William Coburn, “a continuing series of revolutions within a revolution.” Of special note are contributions that explore the bidirectional influences between self psychology and other explanatory paradigms. The volume begins with Stern’s thoughtful attempt to integrate self-psychological and relational perspectives on transference-countertransference enactments. Fosshage and Munschauer’s presentation of a case of “extreme nihilism and aversiveness” elicits a series of discussions that constructively highlights divergent perspectives on the meaning and role of enactment in treatment and on the so-called empathy/authenticity dichotomy. The productive exploration of theoretical differences also enters in the redefinition of notions of gender and sexuality, a topic of increasing interest to self psychologists. Differing perspectives, which give rise to differing clinical emphases, emerge in the exchanges of Clifford and Goldner, and of VanDerHeide and Hartmann. The special “contextualist” demands of work with intercultural couples foster a more integrative sensibility, with self-psychological borrowings from interpretive anthropology and attachment theory. Clinical contributors to Volume 20 explore manifestations of a tension that permeates all analytic work: that between the patient’s newly emerging ability to expand the self in growth-consolidating ways and the countervailing dread to repeat. Enlarged by Malin’s personal reflections of “Fifty Years of Psychoanalysis” and by book review essays focusing on the writings of Lachmann and Stolorow, respectively, Transformations in Self Psychology bespeaks the continuing vitality of contemporary self psychology.

Max Planck Series on Asian Intellectual Property Law Volume 18 Indisputably, Japan is today a major hub of product design, and designs made in Japan play an influential role in the world across a wide range of industries. This is the first and only book in English to provide a detailed overview and discussion of product design protection and practice under Japanese law. In addition to expert analysis of the application of design law by Japanese courts and the Japan Patent Office (including the far-reaching 2020 amendments), the book features seven contributions by Japanese product designers from specific industries who describe the product design process in their industry and its legal ramifications worldwide. With in-depth description and analysis and many detailed explanatory figures and tables, the contributors cover such issues and topics as the following: ownership of design rights; requirements for design protection; application process for design registration; examination procedure; appeals and invalidity trials; design infringement and scope of protection; overlap of design and other intellectual property rights; design protection and competition law; international jurisdiction and governing law; and design rights and commercial transactions. Industry-specific chapters cover the application of design law in furniture, home appliances, cell phones, cars, advertising, product packaging, web design, and typeface design. The book concludes with a chapter highlighting differences in design law in Japan and the European Union. Given that Japanese design experts often note a lack of understanding of Japanese design law and practice by foreign companies, this book will appeal to law firm practitioners and in-house counsel involved in global design right portfolio management and design protection in Japan. It will also appeal to intellectual property scholars and product designers with an interest in Japanese design practice and law.

The Real Cost of Insecure Software • In 1996, software defects in a Boeing 757 caused a crash that killed 70 people... • In 2003, a software vulnerability helped cause the largest U.S. power outage in decades... • In 2004, known software weaknesses let a hacker invade T-Mobile, capturing everything from passwords to Paris Hilton’s photos... • In 2005, 23,900 Toyota Priuses were recalled for software errors that could cause the cars to shut down at highway speeds... • In 2006 dubbed “The Year of Cybercrime,” 7,000 software vulnerabilities were discovered that hackers could use to access private information... • In 2007, operatives in two nations brazenly exploited software vulnerabilities to cripple the infrastructure and steal trade secrets from other sovereign nations... Software has become crucial to the very survival of civilization. But badly written, insecure software is hurting people—and costing businesses and individuals billions of dollars every year. This must change. In Geoeconomics, David Rice shows how we can change it. Rice reveals why the software industry is rewarded for carelessness, and how we can revamp the industry’s incentives to get the reliability and security we desperately need and deserve. You’ll discover why the software industry still has shockingly little accountability—and what we must do to fix that. Brilliantly written, utterly compelling, and thoroughly realistic, Geoeconomics is a long-overdue call to arms. Whether you’re software user, decision maker, employee, or business owner this book will change your life...or even save it.

Get started on your woodwork practice with this ultimate guide to essential carpentry skills, techniques, tools, tips, and tricks. Complete and easy directions for key skills, from simple joinery techniques to more involved woodworking projects, with clear helpful photographs. Key carpentry skills, from simple joinery techniques to fine woodworking projects, through clear, step-by-step instructions and photographs. Getting started on driving for ride-hailing apps can be a pretty daunting task. The ride-hailing app companies make it sound so simple: just sign up with them, attend a short crash course on how to use the apps and your are ready!In reality it can't be that simple, right?Ofcourse it isn't! There are many things that the ride-hailing app companies do not tell their potential drivers - things that drivers find out only after they start driving, things that might have changed they way they do things had they know about it earlier.So what most drivers go through is weeks or months of bumping round before they wise up and this is exactly what this book will do for you. It will reveal the secrets of driving for ride-hailing apps and get you up to speed in no time.This book is a complete guide to driving for ride-hailing apps. It reveals trade secrets that only drivers know to anyone who is interested in exploring driving on a part-time or full time basis.It contains everything that you need to know, from whether you are eligible to drive, what vehicle to pick, whether to buy or rent, what time to drive, where to go and how to maximise your income when driving for ride-hailing apps.There is even Whatsapp support to answer any queries that you may have for readers and drivers who buy this book.Secrets of Driving for a Living will get you so well prepared for driving that you will make profits from the first week of your driving, regardless of which ride-hailing platform you are on.

At 6'1 with a toothy stare, an ebony skin tone, agile and bony-faced Kip was truly dark, slightly underweight, and distinctly Nilotic. Even years of drinking beer and savoring poorly roasted Kenyan meat could not hide his masculine physique chiseled from his days in the military. At 37, he was very alert and sturdy, quick on his feet and ambidextrous. With enough kills to fill a mid-sized truck, he had dark squinty eyes that were often moist and sullied. Through them, nothing reflected. He was dead within. A man with little feelings and even lesser capacity to love and empathize. With ease and agility coupled with a body language that reflected poise and self-confidence, he was naturally endearing yet instinctively closted. He was a breathing killing machine. He was the main man of a sleeper cell; a distinct group of assassins for hire, ready to do Papik’s bidding and to kill for anybody else who had the money to pay them.

The enemy wants us to feel rejected . . . left out, lonely, and less than. When we allow him to speak lies through our rejection, he pickpockets our purpose. Cripples our courage. Dismantles our dreams. And blinds us to the beauty of Christ’s powerful love. In Uninvited, Lysa shares her own deeply personal experiences with rejection—from the incredibly painful childhood abandonment by her father to the perceived judgment of the perfectly toned woman one elliptical over. With biblical depth, gut-honest vulnerability, and refreshing wit, Lysa helps readers: Release the desire to fall apart or control the actions of others by embracing God-honoring ways to process their hurt. Know exactly what to pray for the next ten days to steady their soul and restore their confidence. Overcome the two core fears that feed our insecurities by understanding the secret of belonging. Stop feeling left out and start believing that “set apart” does not mean “set aside.” End the cycle of perceived rejection by refusing to turn a small incident into a full blown issue.

This book looks at the industrial policies of Southeast Asian economies in their motor vehicle industries from early import substitution to policy-making under the more liberalised WTO policy regime. The book examines how inward automotive investment, especially from Japan, has been affected by policies, and how such investment has promoted industrial development in the late-industrialising economies within ASEAN (Association of Southeast Asian Nations). It provides insights into the automotive industry of Southeast Asia in terms of production volumes, sales volumes, market structure, and trade. Through country case studies, the book is a useful reference and illustrates how industrial policies in Southeast Asia have affected the spread of automotive development in the region. It will appeal to policy-makers and researchers interested in the automobile industry, industrial policies in the industry and the spread of development from foreign investors to local firms.
