Regardless of if they are looking to upgrade an existing computer or build a new one from scratch, they'll be able to play the newest games in style and be ready to face the challenges of next year's hottest

titles. The new edition includes information on virtual reality, along with all the latest software, accessories and video technology.

If you're thinking about buying a pre-built gaming PC let me let you in on a little secret, gaming PCs are marked up almost 100% of retail price from their parts. That is, a $1,200 computer would cost around $700-$800 to build yourself (that's including mouse, keyboard, and monitor. If you have those handy, even less!)I know, building a computer is intimidating, but that's just because it's overwhelming if you have no tech knowledge - and believe me, it can be difficult scouring the web for information about computers. You'll find most people will always assume you have some knowledge of computers, so you'll be left playing catch up. No such assumptions are made in this guide, you will learn everything you need to about building a computer from scratch.Don't be a blind consumer, by spending $3.99 on this guide you will save hundreds of dollars by building your own PC. I promise, it's not as hard as you think. Have you ever built a Lego set? If the answer to that is yes, than you can absolutely build a PC and save yourself hundreds of dollars.

Presents information on choosing and buying computer components along with recommendations on specific brands and models.

GameAxis Unwired is a magazine dedicated to bring you the latest news, previews, reviews and events around the world and close to you. Every month rain or shine, our team of dedicated editors (and hardcore gamers!) put themselves in the line of fire to bring you news, previews and other things you will want to know.
